

INDRANIL PAUL

indranil7001@gmail.com | linkedin.com/in/indranil-paul-8a3114296 | github.com/indraaaa29

PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science (AI & ML) student with hands-on experience in Python, C/C++, cloud platforms (AWS, Google Cloud), and applied AI solutions. Completed an AI internship under the Microsoft & SAP TechSaksham Initiative and a cybersecurity internship under the AICTE & VOIS Virtual Internship (Edunet Foundation). Skilled in full-stack web development, computer vision, and secure software practices. Passionate about cybersecurity, ethical hacking, and building scalable, user-centric web applications.

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern | Internship Studio (AICTE – Microsoft & SAP TechSaksham Initiative) Jan 2025 – Feb 2025

- Completed a structured 4-week, end-to-end AI internship covering problem analysis, methodology design, implementation, and report submission.
- Contributed to the full project lifecycle — from defining problem statements to final delivery.
- Earned certification for successful project completion (Certificate No: ISAFIT1176079).

Cyber Security Intern | Self / Independent

Jul 2025 – Present

- Studying ethical hacking, penetration testing, and AI-driven security techniques to build cybersecurity expertise.
- Developing practical skills in vulnerability assessment and system protection through hands-on, self-directed learning.

Google Student Ambassador (Gemini) | West Bengal Connector (Student Coordinator) | April 2026 – Present

- Selected as a **West Bengal Connector (Student Coordinator)** for the Google Student Ambassador Program based on consistent community contributions and leadership.
- Organized and led **Gemini Product Trials**, AI workshops, and campus engagement initiatives to promote Google Gemini.
- Mentored and guided fellow ambassadors by providing support for program tasks, event planning, and community activities.
- Built and managed a campus Gemini community, increasing awareness of Google's AI ecosystem through workshops and hands-on sessions.
- Created AI-powered event concepts, promotional campaigns, and educational content using **Gemini, Nano Banana, Veo, and Lyria**.
- Recognized with the **Bronze Milestone Reward** (GSA Diary & Premium Pen) for active contributions.
- Awarded a **₹500 Amazon Gift Voucher** for outstanding community contributions.

PROJECTS

VoteSetu – Smart Voting & Civic Engagement Platform

| Tech: React.js, Next.js, TypeScript, Node.js, MongoDB, Tailwind CSS | vote-setu.vercel.app | 2026

- Developed a full-stack civic engagement platform to streamline voting awareness and public participation.
- Designed and implemented secure user workflows for voter registration guidance and election information access.
- Built responsive dashboards delivering constituency-level insights and structured election data.
- Integrated real-time data handling and dynamic UI components for improved user experience.
- Applied scalable architecture and clean modular code practices using modern web technologies.
- Deployed and managed the application with optimized performance and accessibility considerations.

Namaste – Restaurant Ordering Website

| Tech: HTML, CSS, JavaScript, GitHub Pages | 2025 – 2026

- Developed and deployed a responsive food ordering platform supporting both delivery and takeaway modes.

- Enhanced digital presence and operational efficiency for a real client-based restaurant.

AI Face Recognition System

| Tech: Python, OpenCV | 2025

- Built a facial detection and identity verification system using computer vision libraries.
- Improved accuracy and automation in user authentication workflows.

Sentinel Architecture – Cybersecurity Project

| Tech: Cybersecurity, Threat Detection, GitHub, Secure DevOps | Mar 2026 – Apr 2026 | AICTE & VOIS Virtual Internship (Edunet Foundation)

- Developed a cybersecurity-focused system applying concepts of threat detection, system monitoring, and secure architecture design.
- Strengthened practical skills in real-world cybersecurity workflows and implementation.
- Integrated version control and project structuring using GitHub.

FlowSync – Smart Venue Management Dashboard

| Tech: React 18, Next.js, TypeScript, CSS Modules, Tailwind CSS, Three.js (WebGL) | flow-sync-kohl.vercel.app | Apr 2026

- Built a real-time analytics dashboard featuring live crowd density tracking and queue monitoring across gates, restrooms, and concessions.
- Implemented sentiment analysis for attendee experience tracking and predictive alerts with smart staff dispatch.
- Delivered light/dark mode with fully responsive mobile design.

CarbWiser – AI-Powered Carbon Footprint Reduction Platform

| Tech: React, TypeScript, Vite, Tailwind CSS, Vitest, Vercel | <https://carbwise-phi.vercel.app/> | Jun 2025

- Built a platform that helps users understand, track, and reduce their carbon footprint through personalized assessments and sustainability recommendations.
- Developed dynamic carbon analytics, action commitment tracking, reduction roadmaps, hotspot identification, and what-if simulation features to drive behavioral change.
- Achieved a 95.8/100 evaluation score and ranked #185 among 32,000+ participants in the Hack2Skill x Google Prompt Wars competition.

Enervia – AI-Powered Smart Hostel Energy Management Platform

| Tech: React, TypeScript, Vite, Tailwind CSS, AI Integration, Vercel | <https://drompulse.vercel.app/> | Jun 2026

- Engineered a smart energy management platform enabling occupancy-aware monitoring, real-time energy tracking, and sustainability-focused insights for hostel environments.
- Implemented an interactive digital hostel map, AI-powered recommendation engine, energy savings analytics, and impact visualization to identify energy wastage and improve operational efficiency.
- Built a responsive, production-ready web application with modern frontend architecture, optimized performance, and scalable component design using React, TypeScript, and Tailwind CSS..

EDUCATION

B.Tech in Computer Science Engineering (AI & ML)

Jul 2023 – Present

Techno India University, Kolkata

SKILLS

Programming Languages: Python, C, C++

Web Technologies: HTML, CSS, JavaScript, React.js, Next.js, TypeScript, Tailwind CSS

Cloud & Security: AWS, Google Cloud (GCP), Cloud Security Basics

AI & Machine Learning: Computer Vision, OpenCV, Face Recognition Systems, Applied ML Concepts

Cybersecurity: Ethical Hacking, Penetration Testing Fundamentals, Secure DevOps

Tools & Version Control: Git, GitHub

ACHIEVEMENTS

- 2111th Rank – Weekly Case Challenge 2 | Unstop (Dec 2026)
- Google Arcade Cohort 1 (2025) | Google Cloud
- GFG160 Coding Challenge | GeeksforGeeks (2025) — Completed 160 curated DSA problems covering arrays, strings, recursion, trees, graphs, and dynamic programming.
- Google Cloud Hands-On Challenges — Completed labs on Vertex AI, core GCP services, and cloud deployment. Recognized with official swag for successful completion.

CERTIFICATIONS

- **AI Infrastructure & Operations Fundamentals** — NVIDIA (*Jan 2025*)
- **Introduction to Artificial Intelligence** — IBM (Coursera) (*2025*)
- **Using Python to Interact with the Operating System** — Google (Coursera) (*2025*)
- **Cloud Computing Security** — University of Colorado (Coursera) (*2025*)
- **Advanced System Security Topics** — University of Colorado (Coursera) (*2025*)
- **Python Bootcamp** — LetsUpgrade (NSDC & ITM Edutech) (*2025*)
- **TCS iON Career Edge – Young Professional** — TCS (*Dec 2024*)
- **Instagram Clone Workshop Certification** — Cuvette Tech Pvt. Ltd. (*Feb 2026*)
- **Optimize Business Processes with AI** — Microsoft Learn (*2026*)
- **Career Essentials in Generative AI** — Microsoft & LinkedIn (*2026*)
- **Claude with Google Cloud Vertex AI** — Anthropic (*2026*)
- **Claude Code in Action** — Anthropic (*2026*)

EXTRA-CURRICULAR ACTIVITIES

- Participant – IETE Eminence 2024
- Participant – GenAI Workshop with Weights & Biases (Machine Learning Kolkata) 2025
- Volunteer – IEM-HACKOASIS 1.0 (Empowering Innovation)
- Participant – Hackhive Hoopla 2.0 (Project Competition)
- Participant – DroidFest Kolkata 2025 — Android & Developer Community Conference
- Participant – Cloud Community Days Kolkata 2025
- Participant – ResCon'26 — Developer Conference by Resourcio Community
